Overview

Profile

Full stack web developer specialising in Next.js, React.js and TypeScript, with strong communication skills and a passion for modern web technologies, scalable web applications and the React ecosystem. Ready for challenging freelance projects and open to permanent positions in the field of innovative web development.

Core competencies:

- Design and implementation of scalable web applications
- Comprehensive expertise in front-end technologies and modern UI libraries
- Development of API backend solutions with Node.js, Express, REST and various database systems as well as experiences with server-side rendering and server actions
- Application of modern development practices: automated deployment processes, clean code and agile working methods
- Strong communication skills and team spirit for effective collaboration in diverse project environments

Tech Stack

- *Frontend:* React.js, Next.js, TypeScript, Tailwind CSS, modern UI libraries like shadcn/ui, Javascript libraries like Tanstack Query, Redux Toolkit, Zustand or Zod
- *Backend*: Node.js, Express.js, PostgreSQL, MongoDB, Prisma, Mongoose, authentication with Clerk or JWS
- *Tools & methods*: Git, automatic deployments, Scrum / Kanban

Professional Work Experience

Date	**April 2024**
Project name	Tortuga Storytelling
Occupation or Role	Web Developer / Freelance
Main Activities	Web development, conception & artistic design, advice on user guidance, corporate design

Project summary	Project for a client in Berlin, Germany: Development of a customised, SEO-optimised website for the presentation of events. Unique, playful design according to the client's specifications. Use of Storyblok as CMS to manage image and text content. Multilingual support in English, German and Spanish.
Stack	HTML, CSS , Next.js, Javascript,, Tailwind, Framer-Motion, Storyblok
Name of the client	Johanna Wollin
Date	**March 2024**
Project name	Mercancia
Occupation or Role	Web Developer / Freelance <···>
Main Activities	Web development, conception & artistic design, advice on user guidance, corporate design
Project summary	Development of a responsive website for showcasing daily use products. Utilizes daisyUI components for the footer, menus, and theme settings. The UI is specifically designed to facilitate ease of use for older generations, enabling easy product viewing and direct contact with the seller via mobile phones
Stack	HTML, CSS , Next.js, Javascript, Tailwind, Framer-Motion, DaisyUI
Name of the client	Johanna Wollin
Date	**December 2023**
Project name	Erdkugel
Occupation or Role	Web Developer / Freelance <···>
Main Activities	Web development, conception & artistic design, advice on user guidance, corporate design
Project summary	Project for a company founder: Development of a contact page with Framer Motion for simple animations. Due to a lack of details on services and images, a minimalist technical stack was chosen. Instead of integrating Google Maps, a link to Google Maps was used to avoid cookies.
Stack	HTML, CSS, Next.js, Javascript, Tailwind, Framer-Motion
Name of the client	Erdkugel GmbH
Date	**2009 - 2022**
Occupation or Role	Specialist in the audio (live / studio) and conference technology sector
Main Activities	Service technician for AV and IT at congresses and presentations, sound engineer and mixing engineer for film, dubbing and audio productions, composer and lecturer for music production
Name of the client	among others: M-Events Cross Media GmbH, JMT, RRP Media UG, Post Republic, Puk a malta gGmbH
Field of activity or industry	Event technology, post-production, audio engineering, music production and education

♥ Favourite private project

Project name	**Salsa-Calendar**
Occupation or Role	Web Developer <···>
Main Activities	Web development, conception & artistic design
Project summary	Development of a web app to overview salsa events with monthly, weekly, and daily views. Registered users can add, update, and delete their own events, visible to all visitors. Authorization is handled via the Clerk library. Utilizes Next.js server actions for backend communication. Features a complex form with frontend and backend validation that sends data to a Prisma database. Incorporates the Google Maps JavaScript API for auto-complete and Edge Store for image hosting and upload with backend validation. The web app is scalable, and the design is currently practical. [Ongoing development!]
Stack	Next.js, Typescript, Tailwind, Framer-Motion, DaisyUI, NextUI, Zod, Tanstack Query, Prisma, Shadcn/ui, Clerk, Edge-Store, Google Maps Javascript API

Vocational training / interships

Date	**November 2022 – June 2023**
Qualification obtained	Certifiacate Full-Stack Web Developer
Main subjects / Professional skills	HTML5, CSS3, Responsive Design, Javascript, Jquery, PHP, MySQL, Wordpress
Name of Institution	Indisoft
Date	**2022 – present**
Qualification obtained	Udemy courses
Main subjects / Professional skills	HTML5 + CSS3, Javascript , Node.js, React.js, Next.js
Name of Institution	Udemy : John Smilga, ByteGrad, Mirko Nasato, Jannis Seemann
Date	**September 2008 – August 2010**
Qualification obtained	Bachelor of Arts, Recording Arts
Main subjects / Professional skills	Industry Perspectives, Cultural Perspectives, Business and Legal Studies, Advanced Industry Applications, Issues and Research Techniques
Name of Institution	SAE Institute Berlin in association with University of Middlesex, London
Date	**September 2005 – MAy 2008**
Qualification obtained	Electronic Music Producer & SAE Audio Engineer Diploma
Main subjects / Professional skills	Theory of Sound, Effects, Sampling, Arrangement, Sequencing, Midi, Programming, Acoustics, Microphones, Loudspeaker, Signal flow, Control Amplifier, Effects, Midi, Sequencing (Pro Tools & Logic Pro), Digital Technique, Surround, Film Synchronisation, Session Procedure, Live
Name of Institution	SAE Institute London & Berlin

School Education

Date	**July 2005**
Degree	A-levels
Name of Institution	Thomas-Mann-Oberschule, Berlin (Gesamtschule)
